- After An Incident Occurs

The Essentials of Managing Aggressive Behavior

This one day program is a “must have” training session for healthcare professionals who are serious about personal safety in our hospitals. As incidents of aggressive behavior in healthcare continue to increase, administrators and providers alike face more and more challenges in de-escalation situations.

Taught by experienced healthcare safety and security professionals, the program prepares the healthcare employee to recognize and defuse aggressive behavior long before it becomes violent, as well as safe techniques to manage the combative patient!

Past Clients Include:

St. Mary's Hospital, IL
St. Joseph's Hospital, WI
St. Anthony's Hospital, IL
Anna Maria School of Nursing, MA
